SYED FURQAN AHMED

Computer Science Student | Linux & DevOps Intern

Karak, KPK, Pakistan • +92 321 6153230 • furqanalishah2256@gmail.com • linkedin.com/in/syed-furqan-0073b5334

PROFESSIONAL SUMMARY

Computer Science undergraduate (5th semester) with a strong foundation in Linux system administration, networking fundamentals, and cloud concepts. Practiced hands-on implementation in local lab environments configuring Linux servers, containerizing workloads with Docker, deploying applications on Kubernetes (Minikube), and automating tasks with Ansible. Possesses formal training in CCNA, RHCSA, and AWS. Seeking an internship in Linux System Administration, DevOps, Cloud Support, or IT Infrastructure to contribute practical technical skills to real-world projects.

TECHNICAL SKILLS

Linux & Operating Systems: Red Hat Enterprise Linux (RHEL), Ubuntu, CentOS, Reverse Proxy (Nginx), Apache2, Nginx, DNS Configuration, Bash Shell Scripting, User/Group Permissions, Systemd Daemons, Storage/LVM, SSH Hardening

DevOps & Containerization: Docker, Kubernetes (Minikube, Pods, Deployments, Services, PV/PVC), Helm, Ansible Automation, Jenkins, GitLab, Git Version Control

Cloud Computing: Amazon Web Services (AWS) — Core Concepts, EC2, S3, IAM, VPC Fundamentals

Networking & Security: Routing & Switching Fundamentals (CCNA), TCP/IP Suite, OSI Model, IPv4/IPv6 Subnetting, VLANs, DNS, DHCP, NAT, Firewalls (iptables, UFW)

Virtualization & Tools: VirtualBox, KVM, Vim, Linux CLI Utilities, YAML Configuration

HANDS-ON TECHNICAL PROJECTS (LAB WORK)

Kubernetes & Docker Microservices Deployment (Lab Project)

Technologies: Kubernetes, Minikube, Docker, Helm, YAML

- Constructed multi-stage Dockerfiles to package application components into lightweight, isolated container runtime environments.
- Authored declarative YAML manifests configuring Kubernetes Deployments, ClusterIP Services, and persistent HostPath Volumes on a local Minikube cluster.
- Packaged and deployed application releases using Helm charts and inspected pod lifecycles, service routing, and container logs using kubectl.

Infrastructure Automation & Configuration Management with Ansible (Lab Project)

Technologies: Ansible, Linux (RHEL/Ubuntu), SSH, YAML

- Developed modular Ansible playbooks and inventory configurations to automate package installations, service management, and user setups across local Linux nodes.
- Implemented repeatable, idempotent playbooks executing over SSH to maintain baseline configurations and prevent configuration drift.

Enterprise Linux Server Administration & Hardening (Lab Project)

Technologies: RHEL, Bash, Systemd, LVM, UFW/iptables

- Configured Linux virtual environments according to RHCSA administration benchmarks: managed LVM storage partitions, users, groups, and systemd services.
- Hardened local server access by disabling root password authentication over SSH, enforcing public-key authorization, and defining firewall rules.

CERTIFICATIONS & PROFESSIONAL TRAINING

Red Hat Certified System Administrator (RHCSA) Training & Prep • Corvit Systems, Lahore — **2025**

Cisco Certified Network Associate (CCNA) Training & Prep • Corvit Systems, Lahore — **2025**

AWS Cloud Computing Training & Prep • Cyberwing, Lahore — **2026**

DevOps Engineering Specialization Training • Cyberwing, Lahore — **In Progress**

EDUCATION

Bachelor of Science in Computer Science (BSCS) • Khushal Khan Khattak University Karak (KKKUK), KPK — **5th Semester (In Progress)**

Higher Secondary School Certificate (FSc – Pre-Engineering / Computer Science) • Board of Intermediate and Secondary Education (BISE) — **2024**

Secondary School Certificate (Matriculation – Science) • Board of Intermediate and Secondary Education (BISE) — **2022**

LANGUAGES

English: Professional Working Proficiency • **Urdu:** Native / Bilingual
